

Varied Fluency

Step 2: Multiply 2 Digits 1

National Curriculum Objectives:

Mathematics Year 5: (5C6a) [Multiply and divide numbers mentally drawing upon known facts](#)

Mathematics Year 5: (5C7a) [Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers](#)

Differentiation:

Developing Questions to support multiplying two 2-digit numbers using area models with Base 10 and no exchanges.

Expected Questions to support multiplying two 2-digit numbers using area models with Base 10, place value counters and numerals. Includes up to one exchange.

Greater Depth Questions to support multiplying two 2-digit numbers using some partially completed area models. Includes up to two exchanges and some use of zero as a place holder.

Multiply 2 Digits 1

Multiply 2 Digits 1

1a. What calculation is represented below?

x =

VF

1b. What calculation is represented below?

x =

VF

2a. Use the area model to circle the mistake.

VF

2b. Use the area model to circle the mistake.

VF

3a. Complete the area model and use the information to finish the calculation.

x =

VF

3b. Complete the area model and use the information to finish the calculation.

x =

VF

Multiply 2 Digits 1

4a. What calculation is represented below?

$$\square \times \square = \square$$

VF

Multiply 2 Digits 1

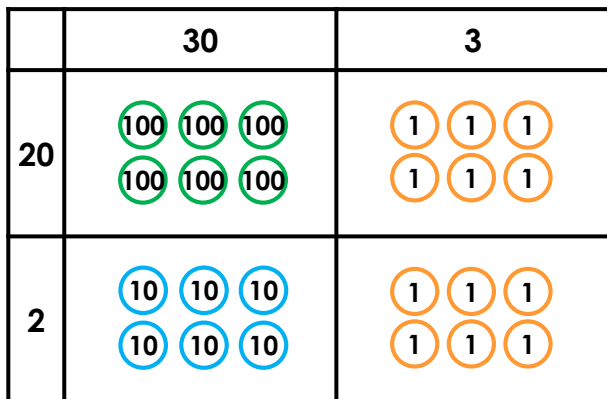

4b. What calculation is represented below?

$$\square \times \square = \square$$

VF

5a. Use the area model to circle the mistake.

VF

5b. Use the area model to circle the mistake.

VF

6a. Complete the area model and use the information to finish the calculation.

$$\square \times \square = \square$$

VF

6b. Complete the area model and use the information to finish the calculation.

$$\square \times \square = \square$$

VF

Multiply 2 Digits 1

7a. What calculation is represented below?

$$\square \times \square = \square$$

VF

Multiply 2 Digits 1

7b. What calculation is represented below?

$$\square \times \square = \square$$

VF

8a. True or false? $81 \times 13 = 1,053$

	80	1
10		
3		

Use the area model to help you.

VF

8b. True or false? $94 \times 22 = 2,086$

	90	4
20		
2		

Use the area model to help you.

VF

9a. Complete the area model and use the information to finish the calculation.

	50	
30		
1		

$$\square \times \square = \square$$

VF

9b. Complete the area model and use the information to finish the calculation.

		1
30		
2		

$$\square \times \square = \square$$

VF

Varied Fluency Multiply 2 Digits 1

Developing

1a. $12 \times 24 = 288$

3a. $11 \times 25 = 275$

Expected

4a. $22 \times 24 = 528$

6a. $21 \times 44 = 924$

Greater Depth

7a. $34 \times 47 = 1,598$

8a. True

	80	1
10	800	10
3	240	3

9a. $31 \times 53 = 1,643$

Varied Fluency Multiply 2 Digits 1

Developing

1b. $23 \times 21 = 483$

3b. $31 \times 32 = 992$

Expected

4b. $18 \times 21 = 378$

6b. $31 \times 19 = 589$

Greater Depth

7b. $34 \times 35 = 1,190$

8b. False, the answer is 2,068.

	90	4
20	1,800	80
2	180	8

9b. $32 \times 41 = 1,312$
