

## Numbers from 11 to 20 – Practical Activities

### Advice and ideas

#### Maths

Provide children with two ten frames and counters. Ask them to explore making numbers from 11-20.

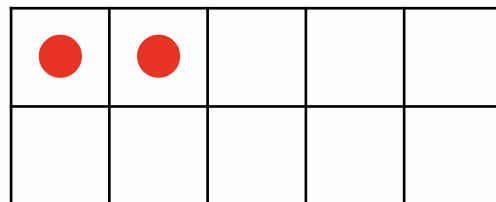

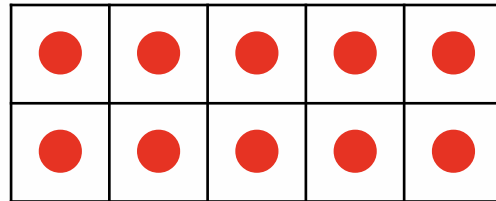

#### Writing

Ask the children to make a number between 11 and 20 using maths resources. Then they should draw a pictorial representation of their number and write the numeral and its name.

### Maths

123

**Use ten frames to make 12.**

## Numbers from 11 to 20 – Practical Activities

### Advice and ideas

#### Fine Motor

Provide a paper plate, cards 11 to 20 (numerals and names), 20 pieces of pasta and tweezers. Ask children to pick a card and use the tweezers to put that number of pieces of pasta on the plate.

#### Outdoor

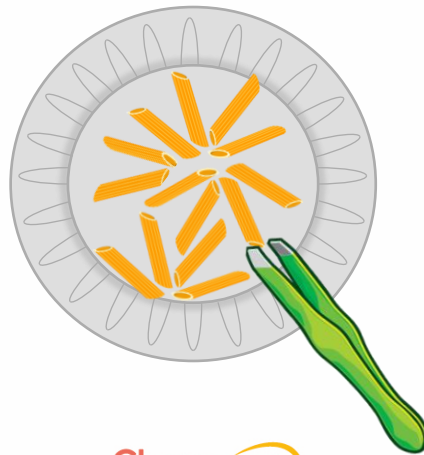

Provide number cards 11 to 20 and a hoop. Encourage children to pick a card and do that many jumps inside the hoop.

### Fine Motor

**Put pasta on a plate.**

**14**

## Numbers from 11 to 20 – Practical Activities

### Advice and ideas

#### Tuff Tray

Provide twenty objects, cards 11 to 20 and two pots (one containing ten objects). Ask children to pick a card and count on from ten to put the correct number of objects in the empty pot.

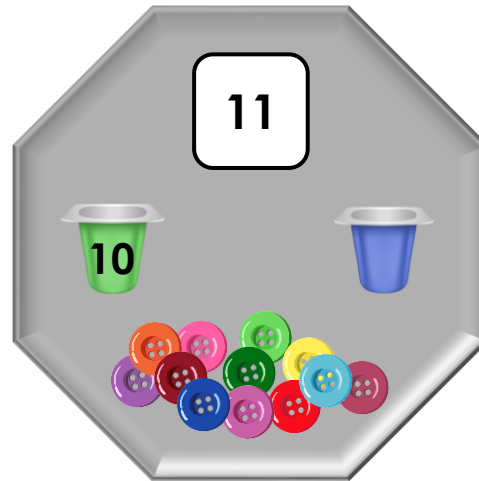

#### Construction

Encourage children to construct their own number line up to twenty using blocks.
