Varied Fluency
Step 4: Make Arrays

National Curriculum Objectives:

Mathematics Year 1: (1N1b) Count in multiples of twos, fives and tens
Mathematics Year 1: (1C8) Solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher

Differentiation:

Developing Questions to support making and understanding arrays. Using multiples of 2.
Expected Questions to support making and understanding arrays. Using multiples of 2, 5 and 10.
Greater Depth Questions to support making and understanding arrays. Using up to 10 columns or rows.
