

## Home Learning-Afternoon Activities

Week beginning: Monday 29<sup>th</sup> June

Subject: Art

Question:

What is collage?

What materials can we stick to create texture and detail?

What colours and textures do we find in the sea?

### Introduction

Today we are going to create a picture using **collage**.

Discuss with someone what kind of things we would find under the sea.

What colours are they?

What colours can you find at home in your recycling? It could be paper, wrappers, leaflets, plastic bags, foil, cellophane, egg boxes, cereal boxes, sandpaper, brown paper, wrapping paper, magazines or newspapers. Remember to ask an adult if it is okay to use.

Younger Children	Older Children
<ul style="list-style-type: none"> <li>• Gather a selection of materials to use. These ideally need to be flat or flattened.</li> <li>• Start your piece of art by tearing and layering tissue or coloured paper for the background. Which layer should we start with? Why? What colours could we use?</li> <li>• How can we show the direction the water flows in and how can we create the movement of the sea?</li> <li>• Now add shapes and materials to create coral, rocks and sea creatures to your sea picture. You could use a black pen to add definition.</li> </ul>	<ul style="list-style-type: none"> <li>• Read the instructions for younger children. You are going to do something similar but yours will be a treasure map.</li> <li>• First, begin to collage the sea area of your map using shades of blue and green paper. If you do not have much coloured paper, you can use recycled materials. Or you could print out some Google Images of sea and cut these up into smaller pieces.</li> <li>• Next, draw the outline of your treasure island over your blue sea collage. You may have to wait for the glue to dry.</li> <li>• Now collage green and brown colours into the island outline to make the land.</li> </ul>

|--|---|
|  | <ul style="list-style-type: none"><li>• Now add details onto your map, such as lakes, mountains, rivers, waterfalls, forests, beaches, paths and of course the “X”, marking the spot where the treasure is hidden! You could use wool, gems, buttons, cocktail sticks, cotton wool, sand, glitter, flour or fabric.</li></ul> |
|--|---|

**Challenge:**

Can you make the background as above (using torn blue and green paper to collage), then draw and cut out the other rocks, seaweed, coral and sea life using black paper? Or you could colour them in black? This would make them like silhouettes or shadows.
