

Science Ideas Based on the story of the Wise Man and the Foolish Man - (from Twinkl)

Materials - Look at the properties of rock and sand. Get the children to build Lego houses on sand and on a more stable surface. Get them to pour water over the top and see which one stays standing. See if they can make the one built on sand more stable.

Separating materials - In the story one of the men builds his house upon the sand so do experiments with sand. Look at separating materials, including sand. Get the children to use different objects, such as sieves and colanders, to investigate the most effective way to separate materials.
