

YEAR 4 HOMEWORK- 20.5.22

Maths

Please can we dedicate this week's maths homework to additional times table practice?. I don't mind how you do this and it doesn't necessarily need to be written down! You could use Times Table Rock Stars, [Hit the button](#), www.timestables.co.uk, write them out, paint them out or even learn a times table song! Try these on YouTube! Remember to focus in on the table you have been asked to learn. If I have told you that you know your tables to 12x12, then you can challenge yourself and try your 13's with [this quiz](#).

Remember to get out and about each week too--- it's just as important as homework! We would love to see pictures of any outdoor adventures ! You can email them to us via secretary@kea.cornwall.sch.uk and we will put them on our HEALTHY BODY board! Thanks for all the lovely pictures received so far! Dog walking, digger driving, beach days, birthday parties, safari parks, **even a 5k run this week!** What an adventurous bunch you are!

PLAY

We have sent the children home with a printed gameboard. It is a game we have played in maths lessons this week. The children have been briefed on how to play it at home, but should any have forgotten, the instructions can be found [here](#)! Have fun! Let us know in your homework book who won and any rule adaptations you made.

Please enjoy our class playlist [here](#)!

Revise!

Y4 Electricity

A circuit is a complete path that electricity flows around.

Circuits need a source of electricity, such as a battery.

Circuits have other components such as wires, a bulb, a motor or a buzzer.

Switches control the flow of electricity around a circuit.

Metals are good electrical conductors; Wood, plastic and glass are good electrical insulators

Remember the importance of staying SAFE online. ALWAYS check with a grown up before using any game, device or app. For further information about staying safe online, visit [this section](#) of our school website.
