## Step 2: Multiply 2 Digits 1

## National Curriculum Objectives:

Mathematics Year 5: (5C6a) Multiply and divide numbers mentally drawing upon known facts
Mathematics Year 5: (5C7a) Multiply numbers up to 4 digits by a one-or two-digit number using a formal written method, including long multiplication for two-digit numbers

## Differentiation:

Questions 1, 4 and 7 (Problem Solving)
Developing Create three area models using the given Base 10 and write the multiplication calculations.
Expected Create three area models using the given place value counters and write the multiplication calculations.
Greater Depth Create an area model and write the multiplication calculation. The answer must fit within the parameter given.

Questions 2, 5 and 8 (Reasoning)
Developing Find whether an area has been calculated correctly by using an area model. Includes an area model frame for support and no exchanges.
Expected Find whether an area has been calculated correctly by using an area model. Includes up to one exchange.
Greater Depth Prove that an area has not been calculated correctly by using an area model. Includes up to two exchanges and some use of zero as a place holder.

Questions 3, 6 and 9 (Reasoning)
Developing Explain the mistake when multiplying 2 -digit numbers using an area model and Base 10. Includes no exchanges.
Expected Explain the mistake when multiplying 2-digit numbers using an area model and place value counters. Includes up to one exchange.
Greater Depth Explain the mistake by drawing an area model and counters when multiplying 2-digit numbers. Includes up to two exchanges and some use of zero as a place holder.

1a．Use the Base 10 to complete three area model calculations．Not all of the Base 10 is needed．

Write the calculations for the area models you have created．

2a．Ted buys $200 \mathrm{~m}^{2}$ of wallpaper for a wall measuring $12 \mathrm{~m} \times 13 \mathrm{~m}$ ．

|  | 10 | 3 |
| :--- | :--- | :--- |
| 10 |  |  |
| 2 |  |  |
|  |  |  |

Has Ted bought enough wallpaper？
Prove it by completing the area model．

3a．Becky has made a mistake when using the area model．

|  | 20 | 3 |
| :--- | :---: | :---: |
| 20 |  |  |
| 1 |  |  |
|  |  | $\\|$ |

Explain the mistake she has made．
号

1b．Use the Base 10 to complete three area model calculations．Not all of the Base 10 is needed．

Write the calculations for the area models you have created．
合
2b．Josie buys $1,200 \mathrm{~m}^{2}$ of turf for her garden that measures $31 \mathrm{~m} \times 41 \mathrm{~m}$ ．

|  | 40 | 1 |
| :---: | :---: | :---: |
| 30 |  |  |
| 1 |  |  |

Has Josie bought enough furf？
Prove it by completing the area model．風
3b．Nadim has made a mistake when using the area model．

Explain the mistake he has made．回

4a. Use the place value counters to complete three area model calculations. Not all of the counters are needed.

| 1 |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | 1 | 100 | 100 | 10 | 10 | 10 | 10 |
| 10 | 10 | 100 | 100 | 1 | 10 | 10 | 10 |
| 100 | 100 | 10 | 10 | 1 | 10 | 100 | 100 |
| 10 | 10 | 10 | 1 | 1 | 100 | 100 | 1 |
| 1 | 1 | 100 | 100 | 10 | 10 | 10 | 100 |

Write the calculations for the area models you have created.

5 a . Jane buys $2,000 \mathrm{~cm}^{2}$ of cloth for the table.

Has Jane bought enough cloth?
Prove it using an area model.

6a. Grace has made a mistake when using the area model.

|  | 40 | 2 |
| :---: | :---: | :---: |
| 20 | 100100100100 | 1010 |
| 100100100100 | 1010 |  |
| 4 |  | 101 |
| 4 | 101010 | 1010 |
|  | 1010 | 1 |

Explain the mistake she has made.

4b. Use the place value counters to complete three area model calculations. Not all of the counters are needed.

Write the calculations for the area models you have created.

5b. Beth buys $1,000 \mathrm{~cm}^{2}$ of material to make a window blind.

Has Beth bought enough material?
Prove it using an area model.
综
6b. Andrew has made a mistake when using the area model.

|  | 10 | 5 |
| :---: | :---: | :---: |
| 20 | (10) 100 | (10)(10)(10)(10) |
|  | (10)(10) | (10)(10) 10 (10 10 |
| 3 | (10) | (1)(1)(1)(1) |
|  | 10 | (1) 1 (1) 1 (1) |
|  | (10) | (1) (1) (1) (1) |

Explain the mistake he has made.

7a. Create an area model calculation with an answer between 1,102 and 1,375 .

|  | 50 |  |
| :---: | :---: | :--- |
| 20 | $100100100100(100$ <br> 100100100100100 |  |
|  |  |  |
|  |  |  |

Write the calculation for the area model you have created.

8a. Gail buys $3,000 \mathrm{~mm}^{2}$ of coloured paper for the back of her school locker.

How much more paper will Gail need?
Prove it using an area model.

9a. Rachel thinks the answer to the calculation $73 \times 18$ is 1,341 .

|  | 70 | 3 |
| :--- | :--- | :--- |
| 10 |  |  |
| 8 |  |  |
|  |  |  |

Explain her mistake using the area model.

7b. Create an area model calculation with an answer between 1,705 and 1,904 .

|  | 80 |  |
| :---: | :---: | :---: |
| 20 | 1001001001001001001109100 (100100100100100100100100 |  |
|  |  |  |

Write the calculation for the area model you have created.

8b. Henry buys $2,500 \mathrm{~cm}^{2}$ of fleece to make a cushion cover.

How much more fleece will Henry need? Prove it using an area model.

9b. Michael thinks the answer to the calculation $63 \times 23$ is 1,448 .

|  | 60 | 3 |
| :--- | :--- | :--- |
| 20 |  |  |
| 3 |  |  |
|  |  |  |

Explain his mistake using the area model.

## Reasoning and Problem Solving Multiply 2 Digits 1

## Developing

1a. Various answers, for example:
$12 \times 22=264,12 \times 31=372,13 \times 21=273$
2a. Yes. Ted has bought $200 \mathrm{~m}^{2}$ and he only needs $12 \mathrm{~m} \times 13 \mathrm{~m}=156 \mathrm{~m}^{2}$
3a. Becky has calculated $10 \times 20$ in the part of the area model for $20 \times 20$.

## Expected

4a. Various answers, for example:
$34 \times 13=442,41 \times 12=492,24 \times 31=744$
$5 a$. Yes. Jane has bought $2,000 \mathrm{~cm}^{2}$ and she only needs $32 \mathrm{~cm} \times 61 \mathrm{~cm}=1,952 \mathrm{~cm}^{2}$.
6a. Grace has calculated $2 \times 40$ in the part of the area model for $4 \times 20$.

## Greater Depth

7a. Various answers, for example:
$22 \times 53=1,166$
8a. Gail needs $276 \mathrm{~mm}^{2}$ because $52 \mathrm{~mm} \times$ $63 \mathrm{~mm}=3,276 \mathrm{~mm}^{2}$ and $3,276-3,000=276$. 9 a . Rachel has reversed the tens and ones digits. The answer is 1,314 .

## Reasoning and Problem Solving Multiply 2 Digits 1

## Developing

1b. Various answers, for example:
$22 \times 21=462,31 \times 21=651,13 \times 11=143$
2b. No. Josie has bought $1,200 \mathrm{~m}^{2}$ but she needs $31 \mathrm{~m} \times 41 \mathrm{~m}=1,271 \mathrm{~m}^{2}$
3b. Nadim has used hundred squares instead of tens rods in the part of the area model for $1 \times 30$.

## Expected

4b. Various answers, for example:
$31 \times 32=992,43 \times 12=516,24 \times 32=768$ 5b. No. Beth has bought $1,000 \mathrm{~cm}^{2}$ but she needs $32 \mathrm{~cm} \times 42 \mathrm{~cm}=1,344 \mathrm{~cm}^{2}$.
6b. Andrew has calculated $20 \times 20$ in the part of the area model for $20 \times 10$.

## Greater Depth

7b. Various answers, for example:
$22 \times 82=1,804$
8 b. Henry needs $335 \mathrm{~cm}^{2}$ because $45 \mathrm{~cm} x$ $63 \mathrm{~cm}=2,835 \mathrm{~cm}^{2}$ and $2,835-2,500=335$.
9b. Michael has forgotten to add another one. The answer is 1,449 .
